RESEARCH INTEREST

Siyu Yuan (员司雨) is a fourth-year Ph.D. candidate at Fudan University's School of Data Science. Her research focuses on advancing fundamental **Planning and Reasoning Capabilities in Language Models**, with a particular focus on building reasoning models and autonomous agents:

- **Reasoning Models:** Exploring and advancing research on incentivizing and understanding complex reasoning and planning capabilities in large language models. Key approaches include *reinforcement learning* and *iterative self-reflection*.
- **Autonomous Agents:** Developing agentic intelligence - autonomous systems capable of making decisions and executing plans with minimal human intervention. This includes investigating their interactions in real-world environments, emphasizing *efficient tool utilization* and *powerful multi-agent collaboration*.
