RESEARCH INTEREST

Siyu Yuan (员司雨) is a four-year Ph.D. student at Fudan University in the School of Data Science. She is dedicated to advancing fundamental **Planning and Reasoning Capabilities in Language Models**, with a particular focus on developing systematic approaches for complex real-world challenges through self-improvement, strategic planning, and tool-augmented reasoning:

- **Self-Improvement Mechanisms:** Enhance the capabilities of language models on complex reasoning problems (such as Math, Puzzle and Interactive Planning Tasks) through self-improvement methods, such as *iterative self-reflection*, *evolutionary optimization*, and *automatic multi-agent collaboration*.
- **Complex Planning:** Investigate complex real-world planning in language models, including *multitask scheduling*, *social strategic planning* and *constrained language planning*.
- **Tool-Augmented Reasoning:** Improve real-world problem-solving by integrating *efficient tool utilization*, *analogical reasoning*, and *meta-action systems* for enhanced decision-making.
